

CHEVROLET MALIBU XTREME

CHEVROLET MALIBU XTREME

Engineered on the Epsilon architecture and featuring timeless styling, the new Chevy Malibu is a perfect choice for anyone seeking a sedan that embodies versatility, innovation and safety in a dynamic ride package. With Malibu XTREME, Chevrolet and GM are showcasing a wide range of parts and body kits that allow customers to personalize and customize their vehicle to their individual lifestyles. Great looks and performance are the two primary requirements for any tuner vehicle, and Malibu XTREME, delivers in droves.

Up front, in back and from a profile, there are plenty of styling elements to this street machine. Carbon Kevlar, for example, is used to accent the front and rear fascias, rocker moldings, the headlamp bezel, grille crossbar and the trim bar on the rear deck lid. From a profile, it's hard to miss the rocker moldings, the custom hood with twin air extractor ducts and the rear wing. Combine all of Malibu XTREME's exterior styling elements with aggressive 19-inch wheels, Toyo Proxes P235-35ZR/19 tires and a suspension that is much closer to the ground, and the result is a vehicle that looks like it belongs on a slot track. Driving or riding in the Malibu XTREME should be entertainment enough in most instances. When it isn't, however, Malibu XTREME offers a Pioneer AVHP 7500 stereo system that can play CD, DVD and MP3 formats – in addition to AM/FM and XM Satellite Radio. A true delight for any audiophile, the system delivers 1200 watts of total power through Pioneer amplifiers and speakers.
